

This project explores how TrustLink Logistics works to move goods safely and on time, using clear processes and smart planning to keep deliveries smooth and reliable.

Business Module

- Customer Management
- Order Management
- Inventory Management
- Warehouse Management
- Shipment Management

Core Modules

- CustomerManagement
- Order Management
- Inventory Management
- Warehouse Management
- Shipment Management
- Payments and Billing Management
- Reporting Management

Key Benefits

- Improved Operational Efficiency
- Faster Order Processing
- Improved Data retrieval process

ER Diagram

Queries & Insights

1

```
SELECT *  
FROM fact_shipments  
WHERE shipment_status = 'Delivered'
```

Shows the details of customers received there product

2

```
SELECT COUNT(*) AS total_shipments  
FROM fact_shipments;
```

Gives count of total shipments

3

```
SELECT SUM(transaction_amount) AS total_revenue  
FROM fact_transactions;
```

Gives total transaction amount

4

```
SELECT o.order_id,  
       c.customer_name,  
       o.order_date  
FROM dim_orders o  
JOIN dim_customers c  
ON o.customer_id = c.customer_id;
```

Gives order id, customer name & order date using group by

5

```
SELECT shipment_status,  
       COUNT(*) AS total  
FROM fact_shipments  
GROUP BY shipment_status;
```

Gives total count of status by shipment status

6

```
SELECT d.driver_name,  
       v.vehicle_no  
FROM dim_drivers d  
JOIN dim_vehicles v  
ON d.vehicle_no = v.vehicle_no;
```

Drivers with
assigned vehicles

7

```
SELECT *  
FROM dim_vehicles  
WHERE capacity > 10;
```

List vehicles with
capacity greater
than 10 tons

8

```
SELECT driver_id,  
       COUNT(shipment_id) AS deliveries  
FROM fact_shipments  
GROUP BY driver_id  
HAVING COUNT(shipment_id) > 1;
```

Find drivers with
more than 1
deliveries

9

```
SELECT c.customer_name,  
       COUNT(o.order_id) AS total_orders  
FROM dim_customers c  
JOIN dim_orders o  
ON c.customer_id = o.customer_id  
GROUP BY c.customer_name  
ORDER BY total_orders DESC  
LIMIT 1;
```

Display customer
with the highest
number of orders

10

```
SELECT transaction_type,  
       SUM(transaction_amount) AS total_amount  
FROM fact_transactions  
GROUP BY transaction_type;
```

Find total
earnings by
payment method

11

```
SELECT *  
FROM dim_orders  
WHERE order_date >= CURDATE() - INTERVAL 30 ;
```

Display orders
placed in the last
30 days

12

```
SELECT *  
FROM dim_customers  
WHERE customer_name LIKE 'A%';
```

Find customers
whose name
starts with 'A'

13

```
SELECT city, COUNT(*) AS total_customers  
FROM dim_customers  
GROUP BY city;
```

Count customers
in each city

14

```
SELECT *  
FROM dim_orders  
WHERE order_date BETWEEN '2026-06-5' AND '2026-06-30';
```

Orders between
two dates

15

```
SELECT driver_name, driver_salary,  
       DENSE_RANK() OVER(ORDER BY driver_salary DESC) AS Salary_Rank  
FROM dim_drivers;
```

Dense Rank
drivers by salary

SWOT Analysis

— TrustLink Logistics —

S

STRENGTHS

-  Strong focus on timely deliveries
-  Real-time shipment tracking system
-  Customer-centric service
-  Skilled logistics and operations team
-  Technology-driven operations (ERP, GPS, AI)
-  Flexible delivery options (same-day, express)
-  Strategic warehouse locations

WEAKNESSES

-  High initial investment in vehicles, warehouses and technology
-  Limited brand recognition as a new company
-  Dependence on fuel prices and transportation costs
-  Limited fleet size in the early stages
-  High maintenance costs for vehicles
-  Need for experienced drivers and staff
-  Cash flow challenges during startup

W

SWOT

**O**

OPPORTUNITIES

-  Rapid growth of e-commerce
-  Expansion into international shipping
-  Partnerships with online retailers and manufacturers
-  AI, IoT and automation in logistics
-  Green logistics and electric vehicles
-  Growing demand for last-mile delivery
-  Warehouse automation and smart logistics

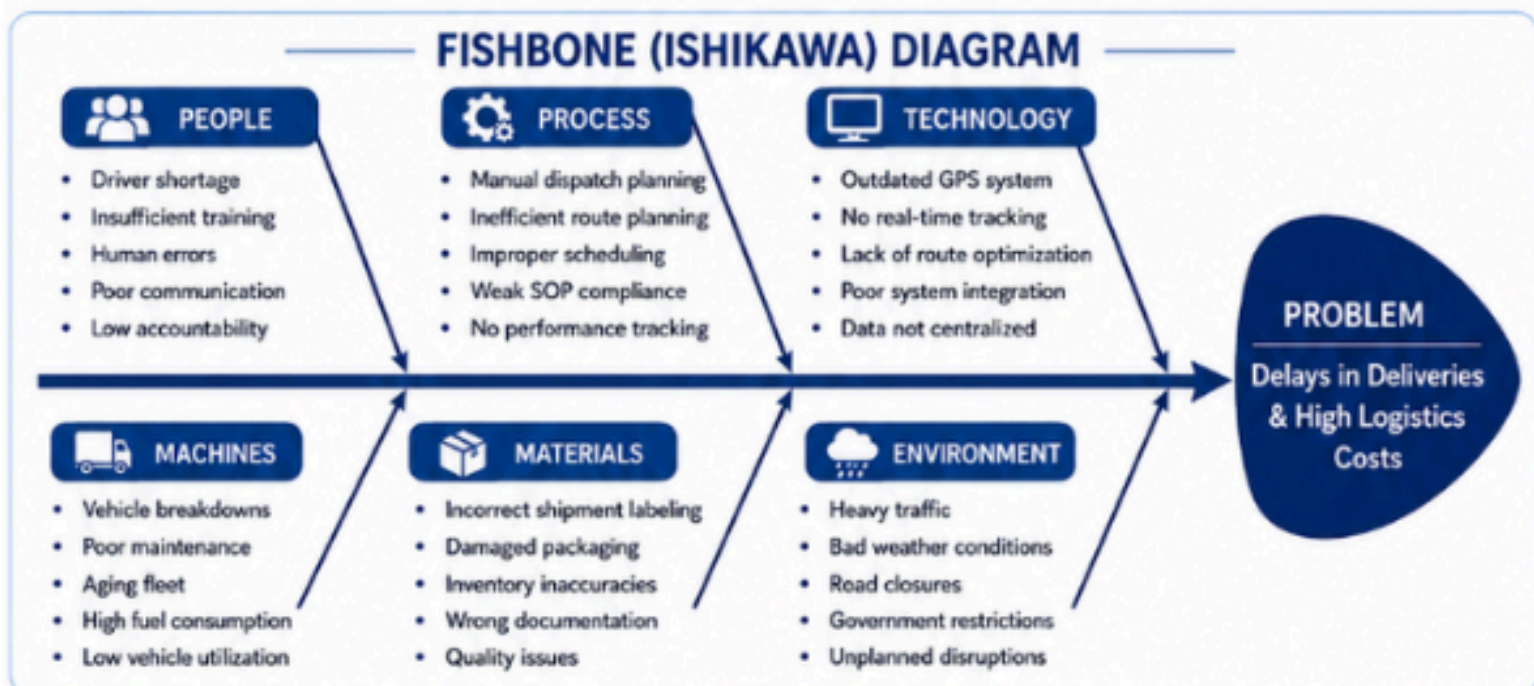

THREATS

-  Intense competition from established logistics companies
-  Rising fuel prices
-  Government policy and tax changes
-  Supply chain disruptions due to natural disasters or pandemics
-  Driver shortages and labor issues
-  Cybersecurity threats to logistics systems
-  Economic downturn reducing shipment volumes

T

5 Why Analysis

Implication Report

1. EXECUTIVE SUMMARY

This Implication Report outlines the expected business, operational, financial, technological and strategic implications of implementing the Root Cause Analysis (RCA) action plan at TrustLink Logistics. The recommended initiatives are aimed at improving on-time delivery, reducing operational costs, enhancing customer satisfaction, and strengthening overall operational efficiency.

2. BUSINESS IMPLICATIONS

Improved Customer Satisfaction

Better service reliability and real-time updates will increase customer trust and retention.

Competitive Advantage

Higher on-time delivery and transparency will differentiate TrustLink in a competitive market.

Scalability

Standardized processes and technology enable business growth and easy scalability.

Brand Reputation

Consistent performance and service excellence will strengthen the TrustLink brand.

3. OPERATIONAL IMPLICATIONS

Process Efficiency

Automation, route optimization, and system integration will streamline workflows and reduce manual efforts.

Improved Visibility

Real-time GPS tracking and dashboards offer end-to-end visibility of shipments and fleet.

Reduced Delays

Proactive maintenance and better planning will minimize breakdowns and delivery delays.

Better Resource Utilization

Optimized routing and load planning will improve vehicle utilization and reduce idle time.

4. FINANCIAL IMPLICATIONS

Area	Current Impact	Post Implementation Impact
 Transportation Cost	High operational costs due to inefficient routes and empty trips	 15–20% cost reduction
 Vehicle Downtime	High repair and maintenance expenses	 30% reduction in downtime
 Inventory Accuracy	Loss due to mismatches and incorrect inventory	 99% accuracy, reduced inventory holding cost
 Customer Retention	Customer churn and complaints	 Higher retention, increased lifetime value
 Overall Profitability	Lower margins due to inefficiencies	 Improved profit margins and ROI

5. TECHNOLOGICAL IMPLICATIONS

System Modernization

Adoption of AI-based route optimization, real-time GPS tracking, and RFID/Barcode systems.

Data-Driven Decision Making

Access to accurate, real-time data will support better forecasting and faster decision-making.

Integration & Automation

Integrated systems (TMS, WMS, CRM) will reduce manual work and errors.

Cybersecurity & Data Protection

Increased dependence on technology requires strong data security and compliance measures.

6. STRATEGIC IMPLICATIONS

- ✓ Supports long-term business growth and expansion.
- ✓ Enables data-driven strategy and continuous improvement culture.
- ✓ Aligns with customer-centric and technology-driven vision.
- ✓ Strengthens risk management and business resilience.

7. RISKS & CONSIDERATIONS

High Initial Investment
Technology and system upgrades require significant upfront cost.

Change Management
Employee training and adoption may face initial resistance.

System Integration Risk
Integration of multiple systems may involve complexity.

Data Accuracy
Inaccurate data can lead to poor decisions and reports.

Cybersecurity Threats
Increased digitalization may expose systems to cyber risks.
